test two

Laravel is a web application framework with expressive, elegant syntax. A web framework provides a structure and starting point for creating your application, allowing you to focus on creating something amazing while we sweat the

details.
Laravel strives to provide an amazing developer experience while providing

powerful features such as thorough dependency injection, an expressive

database abstraction layer, queues and scheduled jobs, unit and integration

testing, and more.
Whether you are new to PHP web frameworks or have years of experience, Laravel is a framework that can grow with you. We'll help you take your first

steps as a web developer or give you a boost as
you take your expertise to the next level. We can't wait to see what you build.
